

Index

Note: Page numbers followed by *f* indicate figures and *np* indicate footnotes.

A

Accountability, ethical, 139
Accreditation Board for Engineering and Technology (ABET), 42
Active learning, 19
Aesthetic judgments, nonmoral, 131
Ajax Corporation, 197
Amakudari, 126
American Association of Engineering Societies (AAES), 42
American Society for Engineering Education (ASEE), 42
American Society for Mechanical Engineering (ASME), 33–46
Code of Ethics, 44–46
American Society of Civil Engineers (ASCE), 42
Autonomy
as concept, 139–140
and dissent, 146
in engineering, 138–139
and engineers, 140–141
personal, 137–143
personal and political vs. professional, 141–142
personal and professional, 143
professional, 137–142
Avoiding ethical problems, 26–27

B

Bid rigging
cultural and ethical issues in, 127–128
definition, 125
in Japan, 125–128
normative ethical relativism, 129
Biogas in Nepal, 172–174
Business ethics
and engineering, 114–116
principles for, 103, 106–107

C

Carbon Car Company (CCC), 145
Case-study analysis, 19
for active learning, 19

definitional clarification, 23
ethical analysis, 23–24
ethical issues identification, 20–21
focus narrowing, 21
practical constraints identification, 26
procedure, 195–196
process review, 25
reasonable assumptions, 22–23
relevant facts determination, 21–22
resolving issue, 25–26
Chemical Industry and Engineering Society of China (CIESC), 48
China
coal mining and energy in, 70–76
engineering and public knowledge, 161–162
engineering professionalism in, 47–50
professionalism in, 46–50
China Association for Science and Technology (CAST), 47–48
Chinese Academy of Engineering (CAE), 47–48
Chinese Mechanical Engineering Society (CMES), 48
Civic rights, 183–185
Coal mining and energy in China, 70–76
COCOM regulations. *See* Coordinating Committee for Export Controls (COCOM)
Codes of ethics
ASME, 44–46
history of, 42–43
professional organizations and, 41–42
Coercion, 139
Competent performance, 68
Confidentiality
employers and, 111
principle of, 112
Conflicting duties
autonomy and dissent, 146
duty of loyalty, 146–147
engineers and dissent, 153
engineers and whistle-blowing, 153–156
faithful agency, 148–149
legitimate authority of employers, 147–148

- Conflicts of interest
 - actual, 150
 - apparent, 150
 - Larry Sapporo case, 151–156
 - prevention strategy, 149–150
 - types of, 150
- Contract model of profession, 40*f*
 - definition, 37
 - to society, relationship of, 38
- Contracts
 - corporations and, 109–110
 - employment, 110
 - work, 110
- Cook stoves in Indonesia, 174–175
- Coordinating Committee for Export Controls (COCOM), 100
- Corporate responsibility, 102, 107–108, 114
- Corporations
 - and compensation, 109
 - and contracts, 109–110
 - and discrimination, 109
 - and fairness, 108
 - and harms, 107–108
 - and laws, 108–109
- Cross-cultural
 - cultural values within engineering, 128
 - ethical principles, global engineering, 134–135
 - nature of values and, 129–131
- Cultural values
 - and ethics, 134–135
 - importance of, 128
 - nonmoral, 134
- Curious George case, 197–203
- D**
 - Dangō*, 125–128
- Discrimination
 - corporations and, 109
 - racial and sexual, 185–186
- Duties, 181–182
 - conflicting (*see* Conflicting duties)
 - corporate, 187
 - of engineers, 188
 - established, 187
 - professional, 184–185
 - work-related, 186
- E**
 - Economic development, 74–76
 - Education
 - engineering, 166–167
 - public, 166–167
 - Emission testing
 - nitrogen oxide emission, 118–119
 - on-road, 119
 - in UK, 118
 - in US, 118–119
 - Volkswagen scandal, 118
 - Employee ethics principles, 110–113
 - Employee rights, 187–188
 - discrimination, 185–186
 - and limits of employers, 184–185
 - nature of rights, 182–184
 - right to privacy, 185
 - and sexual harassment, 181–182
 - Employees
 - and confidentiality, 111
 - and directives, 110
 - and ethics, 112–113
 - and harm, 111–112
 - and honesty, 112
 - and performance, 110–111
 - Employers, legitimate authority of, 147–148
 - Enforcement of rights, 188–189
 - Engineering
 - ethics and law
 - differences, 168–169
 - internationally and cross-culturally, 169–170
 - similarities, 168–169
 - and public, relation of engineers to, 165–168
 - engineering engagement, 167–168
 - public education, 166–167
 - public participation, 166
 - service in, 170–171
 - and society, 163–165
 - traditional vs. superculture view, 164–165
 - The Two Cultures* view, 164
 - Engineering professionalism
 - in China, 47–50
 - in India, 49–50
 - Engineering rights
 - nature of rights, 182–184
 - right to privacy, 185
 - Engineers without Borders, 171
 - Environmental protection, 68
 - Environmental Protection Agency (EPA), 118
 - Ethical accountability, 139
 - Ethical analysis, 23–24
 - problem prevention, 26–27
 - for students, 27–29
 - Ethical issues
 - definitional clarification, 23
 - focus narrowing, 21
 - identification, 20–21
 - practical constraints identification, 26
 - reasonable assumptions, 22–23
 - relevant facts determination, 21–22

Ethical principles
 for employees, 192
 for global engineering, 191
 involvement for engineers, 192
 organizational, 191–192
 rights of engineers as employees, 192–193
 Ethical theory, 10
 considerations, 12–13
 definition, 6–7
 for engineers, 7–9
 issue analysis, 10–13
 problems of theory, 10–11
 role of reason, 11
 role responsibilities, 11–12
 Expert authority, 140–141
 Expertise, 138–139, 141

F

Fairness, corporations and, 108
 Faithful agency, 148–149
 Firestone/Bridgestone relationship, 53–63
 Ford and, 63–69
 Flood protection system, 84
 Ford, 54
 and Firestone/Bridgestone
 relationship, 69
 and Firestone conflict, 56–57
 Fusion power, 13–15, 29–30

G

Global/international/cross-cultural contexts,
 53–54, 63

H

Hierarchical chain of command, 154
 Human rights, 67–68
 Hurricane Katrina, 83–87
 for engineering ethics, 85–87
 for study, 86–87
 Hydrolevel Corporation, 33–35

I

India
 engineering professionalism in, 49–50
 professionalism in, 46–50
 Indian Institute of Technology (IITs), 49
 Indonesia, 174–175
 Institute of Chemical Engineers (AIChE), 42
 Institute of Electrical and Electronics
 Engineers (IEEE), 42
 Institution of Engineers India (IEI), 49

Intellectual property, 188
 Internal vs. external whistle-blowing, 159
 International aid, 170–175
 International collaboration, 14–15
 International Professional Engineers
 Agreement (IPEA), 49
 ITER project, 14–15

J

Japan
 bid rigging in, 125–128
 COCOM membership, 100
 public works contracts in, 126–127
 Toshiba machine tools case, 99–103

L

Law and ethics, 168–169
 Legitimate authority
 of employers, 147–148
 (II-)legitimate employment directives, 112
 Liberal education, 139
 Loyalty, duty of, 146–147

M

Malawi, 171–172
 McDonnell and Miller (MM) Incorporated,
 33–35
 Ministry of Human Resources and
 Development (MHRD), India, 49
 Ministry of Industry and Information
 Technology (MIIT), 48
 Mobile apps and user safety, 95
 Moral rights, 67, 182–184
 Moral values, 131–133

N

National Institute of Technology (NITs), 49
 National Society of Professional Engineers
 (NSPE), 42
 Natural disasters, 83–87
 Natural gas, 73–74
 Negative rights, 182
 Nepal, 172–174
 Nongovernmental organizations (NGOs),
 170–171
 Nonmoral cultural values, 134
 Normative ethical relativism, 129

O

Objective risk, 91–92
 Open vs. anonymous whistle-blowing, 154

P

- Paternalism, 139–140
- Personal autonomy, 137–143
 - and political vs. professional, 141–142
- Personal ethical perspective, 24
- Political autonomy vs. professional, 141–142
- Positive rights, 182
- Practical constraints, 26
- “Pregnancy” mode wireless router, 161–162
- Privacy, right to, 185
- Problem solving, 25–26
- Profession
 - characteristics of, 38–39
 - definition, 36
 - engineering as, 40–41
 - functions of, 41–42
 - to individual professionals, 39–41
 - to society, relationship of, 38
 - types, 36–37
- Professional autonomy, 137–142
 - personal and political *versus*, 141–142
- Professionalism
 - in China, 46–50
 - development of, 35–36, 36*np*
 - engineering, 47–50
 - in India, 46–50
 - nature of, 35
- Professional organizations
 - and codes of ethics, 41–42
 - corporations vs., 33
 - integrity of, 33
- Professionals, 39–41
- Proprietary information, 150–151
- Public knowledge, engineering and, 161–162
- Public safety, 66–69

Q

- Qihoo 360 P1 wireless router, 161–162

R

- Rationality, 139
- Risk acceptance levels, 91
- Role responsibilities, 11–12

S

- Safety
 - engineering as social experimentation, 88–89
 - margins of, 85

- nature of, 89–92
- vs. responsibilities, 93–94
- and technology firms, 95–96

- Self-determination, 139
- Sexual harassment, 179–189
- Sharing economy, 95
- Social experimentation, 88–89
- Sustainable development, 15

T

- Toshiba machine tools, 99–103
- Traditional vs. superculture view, 164–165
- Traffic collision and avoidance system (TCAS), 2–3
- Truthful disclosure, 69
- The Two Cultures* view, 164

U

- Uber
 - ban on, 95
 - rape scandal, 95–96
- Ueberlingen midair collision, 1–13
- User safety and technology firms, 95–96.
 - See also* Safety
- USSR
 - COCOM regulations, 100
 - machine tool exports from Japan to, 101
 - Toshiba subsidiary, 99–100

V

- Value hierarchy
 - moral and nonmoral values, 131–133
- Value system
 - and cross-cultural contexts, 129–131
 - and engineering ethics, 133–134
- Volkswagen (VW)
 - consequences and ethics in business, 118
 - emissions scandal, 119

W

- Water in Malawi, 171–172
- West-East pipeline, 70–76
- Whistle-blowing
 - criteria for, 154–156
 - definition, 153
 - engineers and, 153–156
 - internal *versus* external, 159
 - open vs. anonymous, 154
- Wireless router, Qihoo 360, 161–162
