

How to Find the Room for Lab 1?

As is shown in the figure below, lab 1 is held in the physics department building, while the other four labs are held in the laboratory building. If you have trouble locating the room for lab 1, here is a brief map with two possible routes for you. Good luck!

1 Direct Approach

You can directly enter the physics department building and take either of the two elevators to the 4th floor. (The one on the right hand is recommended.)

Arriving at the 4th floor, you can find the rooms 411 and 413, which are exactly our lab rooms.

2 Indirect Approach

If you are already in the laboratory building, you can also choose this route to go to physics department building.

You can first enter the laboratory building from either of the two doors, just as going to the other four labs.

After that, you can go up to the second floor and find the “room” 213 in the building, which is actually a corridor.

After walking through the corridor, you can either take the elevator or walk up the stairs to the 4th floor.

Arriving at the 4th floor, you can find the rooms 411 and 413, which are exactly our lab rooms.
